1. The SAG AMO Polysius works in Dessau has two new big factory halls under construction; they are to be completed by the end of July 1952.

by the SAG AMO Works Henry Pels, Leipzig, and after the
Works Ernst Thälmann, Magdeburg, furnishes the implements to be
made with boring machines.

3. In 1952, Polysius plans production of a new type of pipe dryer (Rohrtrockner), made from seamless steel, for delivery to Russia. The dryer is to be used in cement factories. There are, however, no seamless steel pipes available in the DDR. EKM, has been ordered to provide the pipes. If this turns out to be impossible, attempts will be made, as a last resort, to procure pipes in west Germany.
